**DETAILED ACTION*****Allowable Subject Matter***

1. Claims 1 thru 6, 8, 9, and 11 thru 15 are allowed. The following is an examiner's statement of reasons for allowance: The references of record, either singularly or in combination, do not teach or suggest at least a device comprising a substrate, wherein the substrate has inwardly concaved recesses having inflection points; a first silicon or silicon alloy layer in the inwardly concaved recesses that forms a pair of inwardly concaved source/drain regions of a second conductivity type having extensions at the inflection points on opposite sides of said gate electrode, wherein the pair of inwardly concaved source/drain regions have an abrupt junction between the first conductivity type region and the first silicon or silicon alloy layer filling the inwardly concaved recesses at the inflection points, wherein the pair of the inwardly concaved source/drain regions have extensions at the inflection points determined by the inwardly concaved recesses creating metallurgical inflection points directly beneath said lower portion of said gate electrode.

Regarding claims 13-15, the references of record, either singularly or in combination, do not teach or suggest at least a device comprising a substrate that has inwardly concaved recesses having inflection points; a silicon-germanium alloy layer in the inwardly concaved recesses that forms a pair of inwardly concaved source/drain regions with extensions directly beneath said lower portion of said gate electrode having an abrupt junction between the silicon germanium alloy filling the inwardly concaved recesses at the inflection points and the first conductivity type region.
